Data

Admin Guide

MOMENTUM

24Q1-2.28UC

GET STARTED

Momentum Telecom offers an intuitive web Portal that makes it easy for Administrators to customize and manage account features and settings online.

Sign In

To Access the My Cloud Services Portal:

1. Open a web browser and enter the URL (web address) provided for online account management.

In most cases your initial Admin sign in credentials come from the Service Provider. If you need assistance for initial sign in (first time login), please contact your System Administrator or the Service Provider primary contact (Support, AM, or PM).

2. Enter the Admin Account Username (xxxxxx@email.com format) and correctly formatted Password credentials in the fields when they are provided/displayed. Note: Password allows up to 30 characters.

❖ Use the [Forgot Password?](#) link to securely update your password credential. Account holders with a defined email address on file in Manage Users can use this tool and will receive an email with a secure link to change the password. Contact your organization's System Admin for assistance if notified that the process cannot complete or if the system identifies that your account does not yet have a notification email address on file.

Note: For your security, the link provided in the *Forgot Password* email is only active for 60 minutes - once that time limit expires, you must use the 'Forgot Password?' feature again to generate a new email with an active link to proceed, or contact your organization's Subscriber Portal SuperAdmin for assistance.

3. Click the **Sign In** button.
4. Follow any **Multi-Factor Authentication (MFA)** method setup steps and/or 6-digit code entry requirements if prompted.

The My Cloud Services Portal opens when security protocols are met.

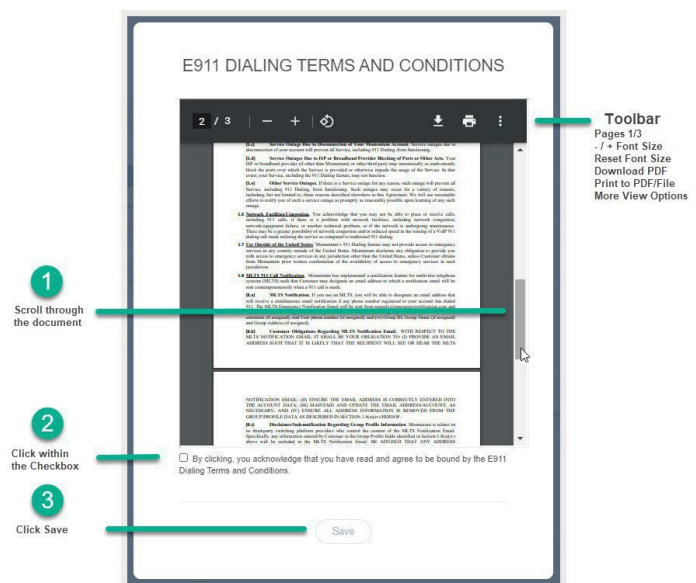

Terms and Conditions

The first time any account holder accesses the portal, an **E911 Dialing Terms and Conditions** acknowledgment dialog displays that must be completed to proceed.

1. Use the tools to review or save the document, as desired.
2. Click to place a check in the acknowledgment check box.
3. Click the **Save** button to submit and close the dialog.

Note: Once submitted, this dialog will not be presented at login again, unless the Terms and Conditions are updated.

Once you sign into the My Cloud Services Portal the first time and acknowledge the terms and conditions, access to the tools and features you need to easily manage your communications features are right at your fingertips.

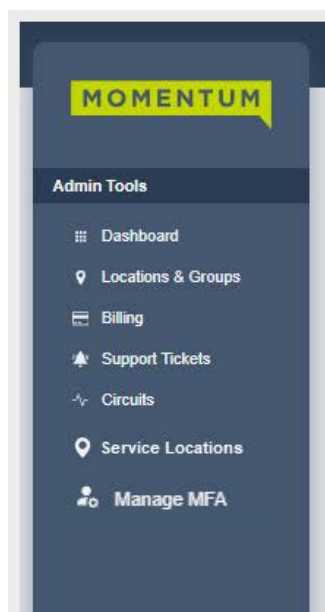

ADMIN TOOLS

The **My Cloud Services Portal** provides useful resources to help with all Administrator-level tasks. Administrators can sign in and instantly locate account information, setup and manage individual user accounts, define universal settings for Groups or Locations, view important system activity or metrics, and much more – quickly and easily online – if they have been granted permission to do so.

When Administrators log into the portal, they see the **Admin Tools** section of the Menu Navigation Panel which provides authorized users with access to manage the related settings and services within the organization's account. This menu displays only those areas the Admin is permitted to view based on their access permissions. Access to work with features and tools within some sections may require additional permissions or will be read-only.

The **Admin Tools** are user specific. The Navigation Menu Panel on the left can include the following sections for Circuits and Data only customers' Administrators who have sufficient access privileges:

- ❖ **Dashboard** - The home page for Administrators
- ❖ **Locations & Groups** - Location or Group level feature/user management tools
- ❖ **Billing - Restricted Access**. Advanced Billing information and payment management for authorized personnel only
- ❖ ***Support Tickets - Restricted Access**. Authorized Admins may be granted access to view (read-only) and/or submit (full access) non-emergency requests for assistance or information to Customer Support
- ❖ ***Circuits** - Review the list of circuits and network devices in inventory (monitored/unmonitored) and related data
- ❖ ***Service Locations** - [beta] View map locations of circuits in inventory and related data
- ❖ ***Manage MFA** - Review activation status/Reset MFA management tool

* Restricted sections and their tools should only be used by specially trained and authorized Administrators with sufficient access permissions.

NOTE: Your system, the purchased products, and your role and/or authorization level determine the sections and features you may be allowed to access, review, and manage.

Each menu option opens the section's main page to begin working with the related settings or services where included on the account. Only the features and services the organization or service provider authorizes the Admin to view will be available for review within the portal. Advanced features should not be authorized for Admin use until well after the system is fully implemented and the Admin is well versed in the use of all basic tools. Additional training is required for advanced/restricted access tools.

For your security, the system's connection to the portal will begin a countdown to automatically close and return to the Sign In page if it is idle for more than 10 minutes and will also require the admin to confirm they are still actively working at 60 minutes.

Dashboard

This page is the Home page for Admins. The **Dashboard** for Circuits Admins provides at-a-glance information about the activity of the accounts and services the Admin may view, site-wide search functionality, and access to all work areas the Admin needs within the portal. *Note: The tools and sections you see may differ from this example.*

Site Search

The Search field at the top of the application offers site-wide search functionality within the areas the Admin may access. Enter text and any matches found within the sections listed in the Admin Tools Navigation Menu below will display for selection.

Admin Information

The **Hi, <User Name>** area at the top of the application opens a drop-down list of quick access links to view your current profile to update the password, open links to review Support and Training resource information, and to Log Out.

Data Admin Dashboard Sections

Each section and widget (card) featured within the Admin Dashboard provides useful information, tools, and filtered access links to the relevant work areas. Unfiltered access to those areas is offered in the Admin Tools Navigation Menu Panel.

Profile

This card at the top of the Dashboard offers account information. The current balance, the latest invoice information, and a direct access link to the [Billing](#) page to review billing or make a payment is available only to Billing Admins in this area, as well.

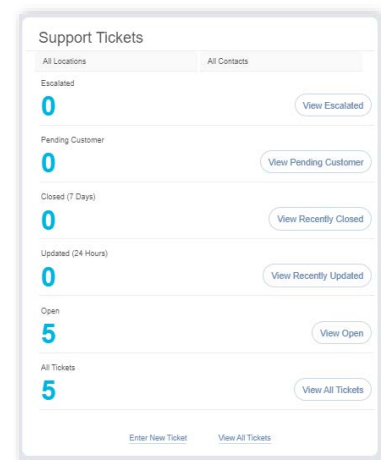

*Circuit Summary

The Circuit summary card displays the current counts for the Circuits and networking devices discovered in **inventory** for the organization along with basic information and the Alarm count data for the *monitored* devices.

*Support Tickets

*This section requires sufficient access permissions to Support Tickets to view and/or to view all features. This dashboard card displays the most recent support ticket activity and offers filter tools, links to review specific tickets (filtered views), a link to the full list within the Support Tickets page, and a linked option to Create a New Ticket.

*Starred Tickets

This section requires sufficient access permissions to Support Tickets to view and/or to view all features in it. The card offers searchable quick view of the tickets the account holder has selected to watch (★ Starred). Click on a ticket number link to view the ticket information.

Click on the orange star adjacent to an item to remove the item from 'watched' status and from this list upon refresh.

Where authorized, Admins may also have access to the **Create New Ticket** tool to report a non-urgent (minor) issue, and/or click the **View All Tickets** link for direct access to open the [Support Tickets](#) page to review the list of currently Open and recently closed trouble/information support ticket submissions (within the last seven [7] days).

Starred Tickets 6

1 - 5 of 6 items

[Enter New Ticket](#)[View All Tickets](#)

*Important Note:

Some Admin Dashboard sections discussed in this document may not need to be displayed in your system -OR there may be additional dashboard sections that display voice tools where those features/services are also in use on the account which are not discussed here and can be reviewed in the *My Cloud Services Admin Guide*.

To secure data appropriately, by default only the organization's designated SuperAdmin has access to view all available Admin Dashboard sections and tools, based on the purchased services and products on the account.

The Dashboard sections display to all others based on purchased services or products and the individual account holder's authorization level as assigned by the organization's designated SuperAdmin. Only Full Access permissions to advanced tools will allow a related section to display with all features in the Admin Dashboard.

My Profile

This section of the portal displays a summary of your account profile information (Name, Address, Phone Number, User ID, Device model, etc.), and provides links to set up a temporary e911 location, review the entire profile, and access your password and directory profile management tools.

The [My Profile](#) link found in the toolbar (the drop-down under the Hi, [account name] in the Toolbar also offers an access point to view the Profile.

The following features and access links are all provided via the [Profile](#) card:

The screenshot shows a profile card titled "Admin" for Mount Green Logistics, LLC. It lists contact details like address, phone, and email. On the right, it shows login credentials and links for password recovery, multi-factor authentication, and an "Edit Profile" button.

Admin	
Mount Green Logistics, LLC 880 Montclair RD BIRMINGHAM, AL 35213 Department: Service Number: Ext. Email: sbokor@momentumtelecom.com Mobile: Pager: YahooId: Location: Mount Green Logistics, LLC Phone Model: Mac Address: Language:	Portal Login Username: prodnewsuite@momentumtelecom.com User ID: Enterprise ID: 3100001951 Password Recovery: Change Recovery Email Change Password Authentication: Enable Multi-factor Authentication Edit Profile

View Profile

[View Profile](#)

Click on the [View Profile](#) button to review your current contact information and access the management tools for your password, email notification settings, and temporary e911 dispatchable address/location changes.

Links to tools views for managing more profile settings, including [Change Recovery Email](#), [Change Password](#), [Enable/Manage Multi-factor Authentication \(MFA\)](#), and the [Edit Profile](#) button, are also displayed here.

Change Recovery/Notification Email

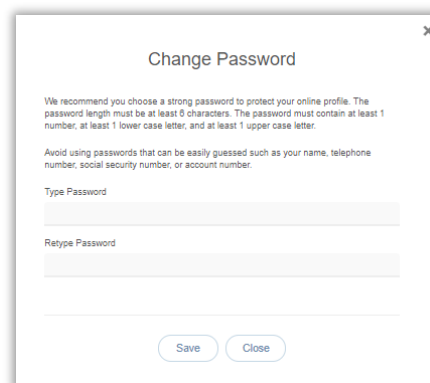

1. Click the [Change Recovery Email](#) link to open the Change Email dialog.
2. Password Recovery Email: Enter or change the email address on file for recovering your login information.
The system will send your password to this email address.
3. Service & CPNI Email Notifications: Enter or change the email address on file for receipt of notifications from the provider.
4. Click on the [Save](#) button when your edits are complete.

The screenshot shows a "Change Email" dialog box with two input fields: "Password Recovery Email" and "Service & CPNI Email Notifications". Both fields have placeholder text indicating where to enter the email address. At the bottom are "Save" and "Close" buttons.

Change Password

The [Change Password](#) link provides direct access to update your unified communications password information.

1. Click on the [Change Password](#) link.
2. Type a new Password.
3. Retype to verify.
4. Click the [Save](#) button.
New passwords must be **8** or more characters and contain at least 1 number or special character, 1 lower case letter, and 1 upper case letter.

Change Password

We recommend you choose a strong password to protect your online profile. The password length must be at least 8 characters. The password must contain at least 1 number, at least 1 lower case letter, and at least 1 upper case letter.

Avoid using passwords that can be easily guessed such as your name, telephone number, social security number, or account number.

Type Password

Retype Password

[Save](#) [Close](#)

Enable/Manage Multi-factor Authentication (MFA)

The [Enable/Manage Multi-factor Authentication](#) link in the View Profile dialog allows users to define the preferred security authentication method (SMS Text or supported code generator Authentication App - Google, Okta, Microsoft). Use the following steps for 1st-time setup or management of account MFA settings while working in the portal if this security protection method has been enabled (as optional or mandatory) for your organization. Instructions for managing MFA settings are provided in the dialog as you make your selection.

1. Click on the [Enable/Manage Multi-factor Authentication](#) link in the *View Profile* dialog.
2. Choose one of the MFA Verification options:

Text Message

- Click to toggle this option **ON**
- Enter your SMS-enabled 10-digit phone number in the field provided and click the [Submit](#) button.

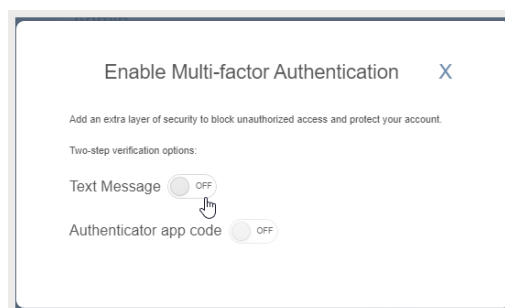

OR

Authenticator App Code

- Click to toggle this option to **ON**
- Scan the single-use QR code that is created to connect your Okta Verify, Google Authenticator, or Microsoft Authenticator app and follow the App's instructions for setup.

3. Enter the six (6) digit code you receive via the method you just setup in the **Please submit your code** field below.

4. Click on the [Save](#) button.
Entry of the 6-digit code received via your selected MFA method will be required on all subsequent portal sign in attempts.

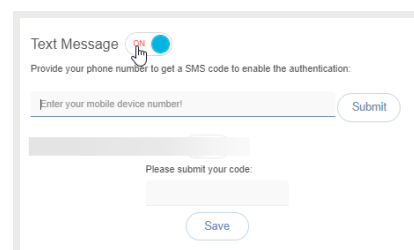

Enable Multi-factor Authentication

Add an extra layer of security to block unauthorized access and protect your account.

Two-step verification options:

Text Message ☒ OFF

Authenticator app code ☐ OFF

Text Message ☒

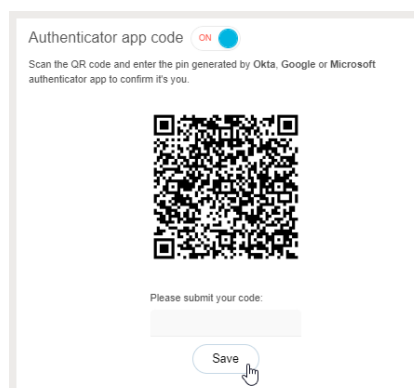

Provide your phone number to get a SMS code to enable the authentication.

Enter your mobile device number!

[Submit](#)

Please submit your code:

[Save](#)

Authenticator app code ☒

Scan the QR code and enter the pin generated by Okta, Google or Microsoft authenticator app to confirm it's you.

Please submit your code:

[Save](#)

Repeat the steps above to modify/change the MFA verification method selection from this dialog

NOTE: When changes are made to these settings, the system deactivates the old MFA method. Users/Admins must complete the steps above in full again for the preferred MFA option to set up a new method.

Contact your organization's Administrator if you need help to Reset MFA in order to access the Portal.

Locations & Groups

The **Locations & Groups** page provides a searchable list of the Locations or Groups for Circuits currently configured on the account to which the Circuit Admin has access. Authorized Admins may search for terms within the list using the **Section Search** tool above the list, use the column headers to sort the data alphanumerically and click on the adjacent **Edit** icon to Manage Users associated with the selected item.

Section Search

Enter terms to locate data specific to the **Locations & Groups** section listings.

Column Links

The link under the **Name** column opens the **Group Settings** view for edits to Manage User.

The **Edit** icon on the far right adjacent to a listing also opens the Group Settings view.

Edit

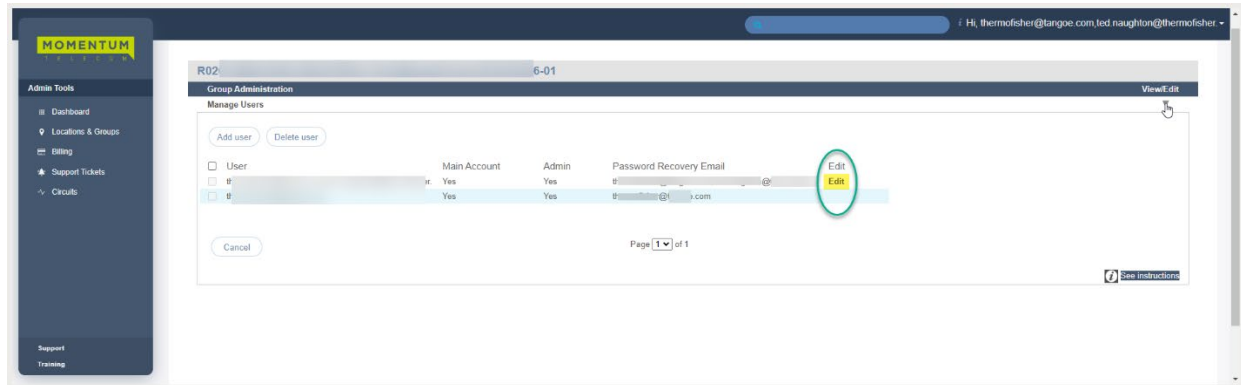

The **Edit** icon adjacent to each Listed item opens the **Group Settings** page for that item.

The link under the **Name** column *also* opens the Group Settings view.

View Locations & Group Settings

While working in the Locations & Groups page:

Click on the Edit  icon next to a listing in the Locations & Groups section to view the Manage Users settings.

Manage Users

Page **1** of 2

Manage Users

Manage user access rights and assignments. **Note:** *Some of these changes (e.g., password changes) will trigger a notification email to the organization's Administrator and/or the notification email on file for the organization per FCC CPNI Change notification regulations.*

Manage User Password and Recovery Email

1. Locate the user account you wish to modify within the list. You may use the Search tool to find a listing using the User ID information.
2. Click the [Edit](#) option next to the selected user account.
3. Enter the following, as needed:
 - ❖ **Password:** Type the new Password and again in *Re-enter Password* to confirm.
 - ❖ **Password Recovery Email:** Type the full email in `name@email.com` format. This is where the system will send the recovery information and notifications when changes are made. Another email will automatically be sent to the Super Admin (or email on file for CPNI Changes) as a notification of the CPNI change to a password.
4. Click the [Save](#) button to submit the change.

Add an Admin Account

Note: Do not attempt to 'change/edit' a system-generated TN user's account into an Admin account.

1. Click on the [Add User](#) button to create a new Admin account.
2. Enter or define the following:
 - ❖ **User Name:** Type the name or designation (phone number, device type, etc.) you wish to display in lists. This must be in the typical email format (username@domain.com)
 - ❖ **Password:** Enter and reenter the initial password assignment for the user.
Minimum Requirement = 8 characters that include at least 1 number / special character and 1 capital letter
 - ❖ **Password Recovery Email:** Enter an email address for this user's password recovery notifications.
 - ❖ **Group Admin:** Option: Click to enable/disable this as the authorization assignment.
Note: A Group Admin will not see all support tickets for the organization if assigned this Advanced Permission option for Support Tickets access; this account will only be allowed to see the Support Tickets they submit, those entered for their location assignment(s) that are set below, and any support tickets submitted without a location assignment.
 - ❖ **Contact Center Manager:** Option: Click to enable/disable this as the authorization assignment.
 - ❖ Highlight item(s) in the **Available Groups** section and use the arrows to add to the **Assigned Groups**.
3. Click the [Save](#) button to submit the changes, add the new Admin, and close the dialog.

Edit Account Access and Extension Assignments

1. Locate the user you wish to modify within the list.
2. Click the [Edit](#) option next to the selected user.
3. Make changes to the following, as needed:
 - ❖ Password (and repeat)
 - ❖ Password Recovery Email: Enter a new email address.
 - ❖ ☒ Assign Administrative Rights to Enable, as needed.
 - ❖ ☒ Assign Contact Center Manager Rights to Enable as needed.
 - ❖ Extension Assignments: Select from the Available Numbers and use the arrows ◀▶ to move to or from the User Extensions box.
4. Click the [Save](#) button to submit the changes and exit.

Manage Advanced Permission Access for Support Tickets

SuperAdmin ONLY - Administrator permissions are set in Locations > Edit > Manage Users. Access to the Support Tickets Admin Tools section is restricted and must be enabled via Advanced Permissions. Recommendation: The Admin should complete training prior to access.

- ❖ The default Support Tickets access permission setting for Administrators is **None**.
- ❖ Read Only access offers admin rights to see submitted tickets but not to submit or edit.
- ❖ Full Access to this area should only be granted to an Authorized Contact for Momentum Telecom Customer Support communications and requests.

Important Note: The fastest way to request assistance or information from Customer Support is a call to 888.538.3960. Urgent issues requiring immediate attention or requests for changes that may affect billing should never be submitted via the Support Tickets tools in My Cloud Services Portal.

To ensure appropriate usage, Admins should receive specialized training on the tools and features found in the Support Tickets sections of the Cloud Services Portal before authorization is granted.

Go to Locations & Groups > Edit > Manage Users

SuperAdmin while working in Manage Users:

1. Locate a portal account in the list. Note: Best practice is to only provide such access to accounts created for authorized personnel to be used solely for administration to better secure data for compliance.
2. Click on the [Edit](#) option next to the selected account.
3. Click on the [Advanced Permissions](#) link [Advanced Permissions](#) that is visible to the SuperAdmin to review and edit the *Advanced Admin Permission* settings for Support Tickets.

Please Note: At this time, restricted features and tools are not enabled for portal account holders by default and will require additional authorization by the SuperAdmin for access to be granted.

4. **Ticketing** – Click within the appropriate radio button ☐ to select the level of **Support Tickets** section and feature access for this account. *Default = **None***, or select *Read-Only*, or *Full* access.

Default Setting = NONE for all except the SuperAdmin. Other options are Read Only and FULL Access. Use Caution as additional access to these tools can be a security risk.

Best Practice for Support Tickets section/feature access:

- **NONE** is the default because the vast majority of portal account holders should not have access to review or submit support tickets as a security precaution for all Organizations.
 - **Read-Only** authorization allows portal accounts with this permission level to view some tickets submitted by those authorized to contact the Provider's Customer Service department on behalf of the Organization within the Support Tickets section.
 - **Full** - Use Caution. Very few portal account holders should ever be granted FULL access. Do not provide **Full** Access to any portal account holder that does not have the full authorization of your Organization to review all eligible support tickets for the organization, or who are not authorized to communicate with or make change or billing requests of the Service Provider on behalf of the Organization.
5. Click the **Save** button to submit the change for the selected Admin, close the dialog, and return to the *Edit User* view.

Note: It takes a few minutes to update and propagate the new settings for the account holder. Upon their next portal login, the account holder that was just edited will see the appropriate Support Tickets areas per the level of access granted by the SuperAdmin.

*Billing

Restricted Access. Only Authorized Billing Administrators have access to the **Billing** page.

The Billing page provides tools for reviewing and managing the monthly billing and payments for the Enterprise account or Locations on the Enterprise Account (where enabled and authorized for use by the organization).

[Set Up](#)

Pay My Bill

Once an authorized Admin is viewing the billing data, the [Bills](#) and [Current Billing Method](#) sections of the page offer access options to setup payments.

The [Pay My Bill](#) button and [Set Up](#) buttons both open the [Bills](#) page where you may select from the following payment method options:

1. Fill in the requested information to make a payment and/or create a recurring payment schedule.

Bills

Pay by credit/debit card

[Setup a recurring credit card payment>](#)

[Make a one time credit/debit card payment>](#)

[Setup a recurring bank draft>](#)

Note: Eligible debit cards will be transacted through the Electronic Funds Transfer network. Momentum can process debit cards on the STAR and PULSE networks or debit cards as credit cards provided there is a Visa, MasterCard, or American Express logo on the front of the card.

2. Click [Save](#) or [Submit](#) to complete the payment process you selected.

Setup a Credit Card Payment

1. Click the [Make a one-time credit/debit card payment](#) link to pay the current bill.

OR

2. Click the [Setup a recurring credit card payment](#) link to enter payment information, schedule payments to occur at defined intervals and save this as the payment process.
Note: When you initially set up a recurring payment method, any past due balance will be included with the current cycle charges on your first scheduled payment dates so that your account is made fully current.

Pay By Credit/Debit Card

Please fill in the following information to make a payment. Eligible debit cards will be transacted through the Electronic Funds Transfer network. Please note that Momentum can only process debit cards utilizing the STAR and PULSE networks. If your debit card is not supported either of these networks (see logos on the back of your card for applicable networks), you will not be able to successfully complete a debit card transaction. However, you may utilize your card as credit card, provided there is a Visa, Mastercard, or American Express logo on the front of the card.

Note: Specialized permission and training is required before access to Support Tickets is granted. The permission options for Administrators include No Access, Read-Only Access, or Full Access.

The **Support Tickets** section provides Read only authorized Administrators with access to view the list of **open** tickets submitted via the Portal, along with the tickets that have been **closed within the past 7 days**. Full Access grants permission to review, submit, and update currently open tickets in this section, as well.

Each submitted ticket is listed in a simple table view that is sortable (alphanumeric sorting), filterable (drop-down selections), and searchable (Search field). The displayed ticket information includes Starred (watched), Ticket Number, Status, Subject, Contact, Priority, Opened, Closed, Escalated, Category and Communication (preferred method). The Ticketing page also provides tools to create new tickets, set tickets as Starred (watched/favorites), Edit (comment, update, or request closure for) any open tickets within the list, and to Export the list of tickets within the view to a .csv spreadsheet file.

*Tickets entered via the Portal should be requests for information or assistance with **non-emergency** issues. Requesting assistance with multi-step change processes, billable changes, or urgent issues should **always** be called into Customer Service (888.538.3960) or the Account Manager to ensure that the specialized expert assistance needed for those requests is always provided in a timely manner for speedy resolution.*

A section Search tool for finding any information within the Ticket list.

Create New Ticket

If displayed, this link opens the New Ticket view to allow the Admin to create and submit a new request for assistance to Customer Service for Voice services.

Export Tickets

Creates a downloadable copy of the basic Support Ticket table list contents in a .CSV spreadsheet format file. That file may be saved in a local folder.

Click the Star icon in the first column to set the adjacent Ticket as **Starred** (watched) in the Support Tickets page and to add the ticket to the **Starred Tickets** card on the Dashboard for easy access and review. Click the Orange Star icon again to remove the star and stop 'watching' that ticket in the Portal.

Where provided, the **Edit** icon opens the selected Ticket for detailed review and/or new comments, attachments, or to request closure.

Ticket Submission Types

My Cloud Services Portal provides Administrators who are Authorized Contacts for Momentum Support with the tools to submit minor tickets to customer service for **non-emergency** issues (Data) and requests for information while working in the Portal. Do not use this method to report outage, critical, or major issues. Tickets requesting multi-step change processes, billing changes, or urgent issue reports **require** a call into to Customer Service line **888.538.3960** to ensure that the specialized expert assistance needed for those requests is always provided in a timely manner for speedy resolution.

Search for Tickets

Section Search – The **Search** field within the *Support Tickets* page (top right) offers a full-featured text search of all information found within the Support Tickets section.

Filter the Ticket List

Ticket	Status	Subject	Contact	Priority	Opened	Closed	Escalated	Category	Communication...
All	All		All	All			All	All	
00706544	All Closed Open	Test Ticket	James Perry	Informational	07/18/2019 01:28 PW	07/18/2019 03:50 PW	no	Audio Quality	

- The **Column Headers** offer sorting and filtering tools to make it easy to find specific ticket types or information.
- Click on the **Column Header Name** to sort the list ↑ alphanumerically ↓ by the column contents.
- Beneath some of the column headers are drop-down selection tools to **filter** by the specific types of information displayed within the table.
- Click on the **Clear Filters** link in the table header section (far right) to remove any applied filters and return to the default list view.

Watch Tickets

The first column in the Support Tickets page view offers Admins the ability to set a ticket as **Starred** (watched) which in turn lists the watched tickets first when returning to the Ticketing page and displays the selected ticket(s) information in the **Starred Tickets** dashboard section for easy access to review updates as the Admin logs into the My Cloud Services Portal.

Simply click on the ★ star icon adjacent to a selected ticket listing in the Support Tickets page to turn it orange ★. The list will display watched tickets first and add the selected ticket to the Dashboard **Starred Tickets** watch list as well.

Download the Ticket List

- Click on the **Export Tickets** link (top right) to download a .CSV format (comma-delimited) spreadsheet containing the basic ticket information that is currently available within the table view.
- Click on the file download when it is completed to open the file in your spreadsheet application.
- Save the file to a location within your local system as desired for use/review.

Create a New Ticket

Authorized Admins may be granted access to create and submit support tickets. This tool is available from the Dashboard in the [Support Tickets](#) and [Starred Tickets](#) cards and in the Support Tickets page. As an Admin makes selections to create the ticket, the dialog dynamically offers additional fields and options to assist.

Call Customer Care at 888.538.3960 for important issues that cannot wait for attention.

1. Click on the [Create New Ticket](#) link in the Dashboard or at the top of the Support Tickets page.

The screenshot shows a 'New Ticket' form. On the left, there is a 'Create New Ticket' link. The form itself has a title 'New Ticket' and a 'Type *' dropdown menu with 'Data' selected. Below this are four 'Select' dropdown menus for 'Category', 'Location', 'Contact', and 'Contact Method'. To the right of these is a 'Subject *' text input field and a 'Description *' text area. At the bottom of the form are five buttons: 'Submit', 'Add Attache...', 'Add Attache...', 'Add Attach...', and 'Cancel'.

2. Select or enter the following information for the ticket. * = a Required Field
 - **Type***: A selection field displays only if Voice services are also implemented - and voice becomes the default 'type'. Required: if displayed, choose from Data, Voice, or Both to continue and create a ticket.
 - **Category**: Optional. Choose the appropriate ticket Category option from the drop-down selection menu.
 - **Location**: Optional. Select the appropriate Location option from the drop-down selection menu.
 - **Contact**: Optional. Select your name (or appropriate Authorized Customer Support contact) for receipt of responses and updates regarding this issue. Note: Write In should not be used if you are NOT already authorized with the Service Provider to contact Support on behalf of your organization.
 - **Contact Method**: Optional. Select the best method of Support response from the drop-down menu options (Email, Phone). If no option is selected, Your organization's Authorized Contacts' corresponding information for the selected method (as it is currently on file with Customer Support) will be used. *Please note, once a ticket is entered via the portal, updates to it will also be displayed to the Admin in the Support Tickets section in the Portal and it remains in the list (read-only view) for up to seven (7) days after it is closed.*
 - **Subject***: Required. Type a concise descriptive subject line for the ticket – this information will be the first indication of the issue or request that Support will see and will be displayed for review within the Ticket lists. *Example: Circuit XXXX showing packet loss for past 2 hours.*
 - **Description***: Required. Enter a complete description of the issue or request. Include all relevant information about the issue or request (reproduction instructions, steps taken to fix, times noted, and any other information that will help Customer Support quickly resolve the issue for you or respond with the information you require as quickly as possible. Ticket Description contents may be edited in the portal for up to 24 hours however, use **Add Comments** to update ticket information rather than editing the Description field. Using Comments ensures that all ticket contacts are notified of changes and updates quickly.
3. Click on the [Submit](#) button when all information has been included to send the ticket to Support and make a note of the new ticket # that displays upon successful submission. You may also click the [Cancel](#) button to quit and return to the last view.
OR - Complete the following steps prior to clicking [Submit as needed](#) to include additional information (a specific device or circuit) or attachments (screenshot images, a .txt log file) with the ticket submission to help Customer Care to provide the assistance you've requested more rapidly.

Add Affected Circuits to a Ticket

1. Click on the [Add Circuits](#) button to open the list.
2. Click within the adjacent ☒ check box to select one or more affected circuits. Click again to remove selections.
3. Click the [Add as Comment](#) button when finished to include that information with the ticket submission. Or click [Close](#) to exit the dialog without making changes.
4. Click on the [Submit](#) button if ready to send the ticket to Support.
Make a note of the new ticket # for future reference.

Add Affected Circuits

Select	Circuit ID	Circuit Name	Downed...	Updtd...	Location	Notification Email
<input checked="" type="checkbox"/>	R08022	US412	20	20	US	admin@mycloud.com
<input type="checkbox"/>	R08007	US411	50	50	US

Add Attachments to a Ticket

Admins may attach individual PDF or Image files to a ticket to include screenshots or reports that may assist Customer Service with issue resolution.

1. Click on the [Add Attachments](#) button to open a local file selection form.
2. Browse to, select, and click [Open](#) to add an Image (.jpeg, .gif, .tiff, .png) or PDF file from your system that will be submitted along with the ticket.
3. Repeat the steps above to include more file attachments, as needed. *The system will notify users if the selected attachment file size limits are exceeded or the attachment file types are incompatible.*
4. Select the [View Attachments](#) link (top right) to review or remove **X** attachment(s) before submission.
5. Click [Submit](#) when all ticket information is included to send the ticket with attachment(s) to Support. Or click [Cancel](#) to clear all selected/entered information and quit the ticket creation process.
Make a note of the new ticket # for future reference.

Add Attachments

Attachments: 3

Subject *:

Concise Description of the Issue - Displays in LISTS

Description *:

This field allows the Admin to enter a complete description of the Non-Urgent issue(s) or requests for information. It offers sufficient space to enter supporting information, reports, data from call logs, steps taken to fix the issue, etc. Please call Customer Support for any issues that require immediate attention.

IMPORTANT NOTE: Once the ticket is submitted to support, the information in this field can be modified for up to 24 hours - however updates made in this field do not generate a notification of the changes. It is highly recommended that any new information about the issue be entered as a COMMENT to ensure that Support receives a formal notification of the new data.

View Ticket Updates

Quick access to review any updates to submitted Tickets is available in the Admin Dashboard if authorized to view those features (Full Access)

Information about each available ticket is displayed within the Support Tickets page. Access to open tickets to view more information is provided for a read-only view using the Ticket Number link or click on the adjacent **Edit** icon within the Ticket list to view and update or comment on a ticket.

View Ticket Attachments

While working in the Support Tickets page:

- Click on the Ticket Number in the table,
Or click on the **Edit** icon adjacent to a Ticket to open the *Edit View*.
The number of attachments is listed above the Description field as a reference.
- Click on the [View Attachments](#) link (top right in the Ticket Edit view).
A pop-up dialog displays a list of the attached file name(s) that the submitter included.
- Click on the desired file name within the pop-up dialog to download and then open a copy of the attachment.

Edit a Ticket

The initial information defined for the ticket cannot be modified, however new information, attachments, or Affected Circuits or Devices selections may be added at any time while the ticket is still *Open*.

While working in the Support Tickets page:

- Click on the **Edit** icon adjacent to the desired Ticket within the list.
- Add a comment or use other available tools as needed to add information to the Ticket or Request Close.
- Click the **Submit** button when finished to send the Ticket update(s) to Support or click on the **Cancel** button to remove the latest changes and revise your edits or just exit without making changes.

Add a Comment to a Ticket

To notify Support of changes or additions to the original request or issue description, submit a **Comment**. Note: Changes made to the description information (if still allowed) are not identified as 'updates' and will not be included by Salesforce in notifications to ticket owners/team members or the ticket submitter.

While working in the Support Tickets page:

- Click on the **Edit** icon (Far right column) adjacent to the ticket you wish to update with a new comment.
The Ticket's Edit View displays.
- Click on the **Add Comment** button to open a *New Comment* field.
- Type up to 3000 characters and spaces in the *New Comment* field.
- Click on the **Submit** button to send your latest comment to Support or click on the **Cancel** button to remove the latest changes and revise your edits or exit.

Request Ticket Close

Caution: This action is immediate. Once the request to close is submitted to Support, the ticket is set to Read Only within the Portal. Customer Care will finalize any work on the issue and close the ticket. If this request is made in error, a new ticket must be created and submitted OR contact Customer Support directly via phone to request a 'Re-Open' for the ticket.

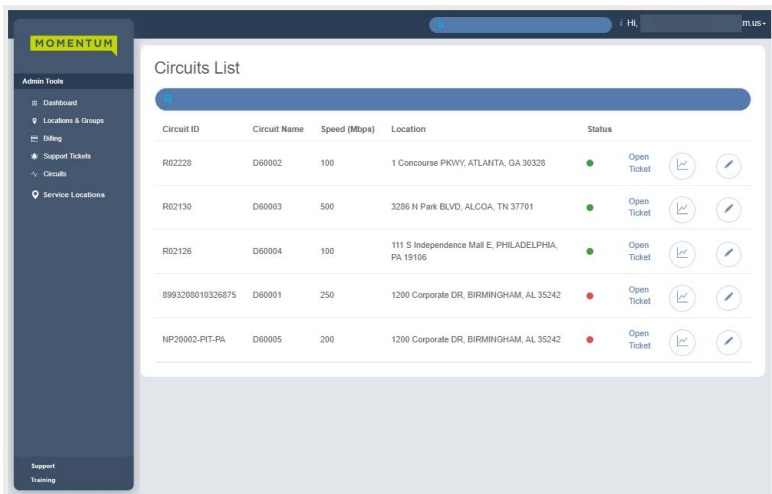

While working in the Ticket [Edit](#) view:

1. Add any supporting comments, attachments, or affected user/device updates that are needed by Support.
2.  Click on the [Request Close](#) button to send a request to Support to close the ticket.

Once submitted, the focus returns to the Support Tickets list and the ticket status updates to show a close was requested. The ticket is no longer available for further modifications or comments within the Portal and becomes 'Read-Only'. Support staff will close the ticket.

*Circuits

The [Circuits](#) menu option in the Admin Tools left navigation panel opens the Circuits List. This section offers a searchable list of the circuits on the account with tools that allow an Admin to sort the list [↑](#) alphanumerically [↓](#) by clicking on the column headers. This section provides authorized Admins with helpful information about the activated circuits in inventory with the Service Provider on the account.

Circuit ID	Circuit Name	Speed (Mbps)	Location	Status
R02228	D60002	100	1 Concourse PKWY, ATLANTA, GA 30328	Open Ticket
R02130	D60003	500	3286 N Park BLVD, ALCOA, TN 37701	Open Ticket
R02126	D60004	100	111 S Independence Mall E, PHILADELPHIA, PA 19106	Open Ticket
8993208010326875	D60001	250	1200 Corporate DR, BIRMINGHAM, AL 35242	Open Ticket
NP20002-PIT-PA	D60005	200	1200 Corporate DR, BIRMINGHAM, AL 35242	Open Ticket

Section Search

Enter terms to locate data specific to the [Locations & Groups](#) section listings

Status

Up | Down color coded indicators for **monitored** circuits only.

Edit

The Edit icon adjacent to each listed item opens the *Edit Circuit Item* dialog

Open Ticket

Where visible, click to create and submit a ticket for the adjacent device

Graphs

Beta only. The Graph Icon opens a new view with graphic displays of useful metrics for the adjacent item

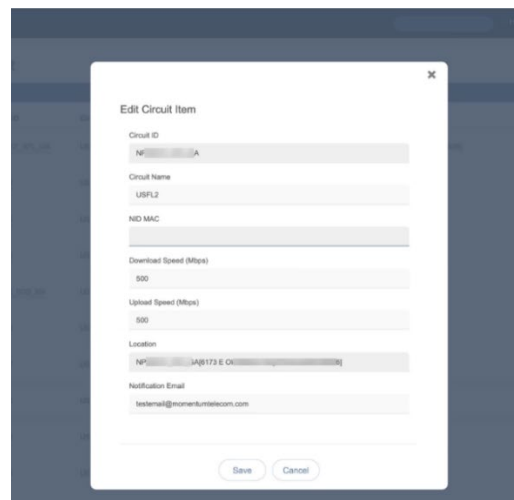

The table in the Circuits List provides the following information for each listing:

- Circuit ID – The circuit identifier
- Circuit Name – The circuit type name - can be changed to display in lists within this portal
- Speed (Mbps) – General upload/download speed of the circuit displays (where applicable)
- Location – The location information on file for the item
- Status – If monitored, this column displays an up/down status indicator. Green ● = UP | Red ● = Down
- Open Ticket – If visible, click to create and submit a ticket for the adjacent device - Ref: Support Tickets
- Graphs – Click to view graphical performance metrics
- Edit – Click to edit information shown in this portal related to the adjacent device

Edit Circuit Information

While viewing the Circuits List, some information can be modified for each listing.

1. Click on the **Edit**  icon adjacent to the desired listing to open the Edit Circuit Item dialog.
2. As needed, make changes to the following fields (if authorized and/or the system allows edits for the item):
 - Circuit ID: Read-Only. The assigned identifier for the circuit
 - Circuit Name: Enter a name to display in lists or searches within this portal
 - NID MAC: Read-Only. The mac address for the device
 - Download Speed (Mbps) and Upload Speed (Mbps) - Enter information to display in this portal, as desired.
 - Location: Read-Only. The address on file.
 - Notification Email: Enter a correctly formatted email address that will be used to send automated notifications for the selected circuit if it is monitored by Momentum.
3. Click **Save** when finished to update the system with the new information and exit the dialog **or** click **Cancel** to quit and exit the dialog without making changes.

View Performance Metrics

While viewing the Circuits List:

Click on the name of the desired item where it is listed in the **Circuit ID** column to open a view with performance metrics for that item. Interactive Graphics show useful metrics data and historical information, such as *Latency History and Packet Loss Data*. Filter tools above the graphs offer options to refine the data more specifically.

Click the *[Expand]* tool above a graph to increase the size of the selected section for a better view.

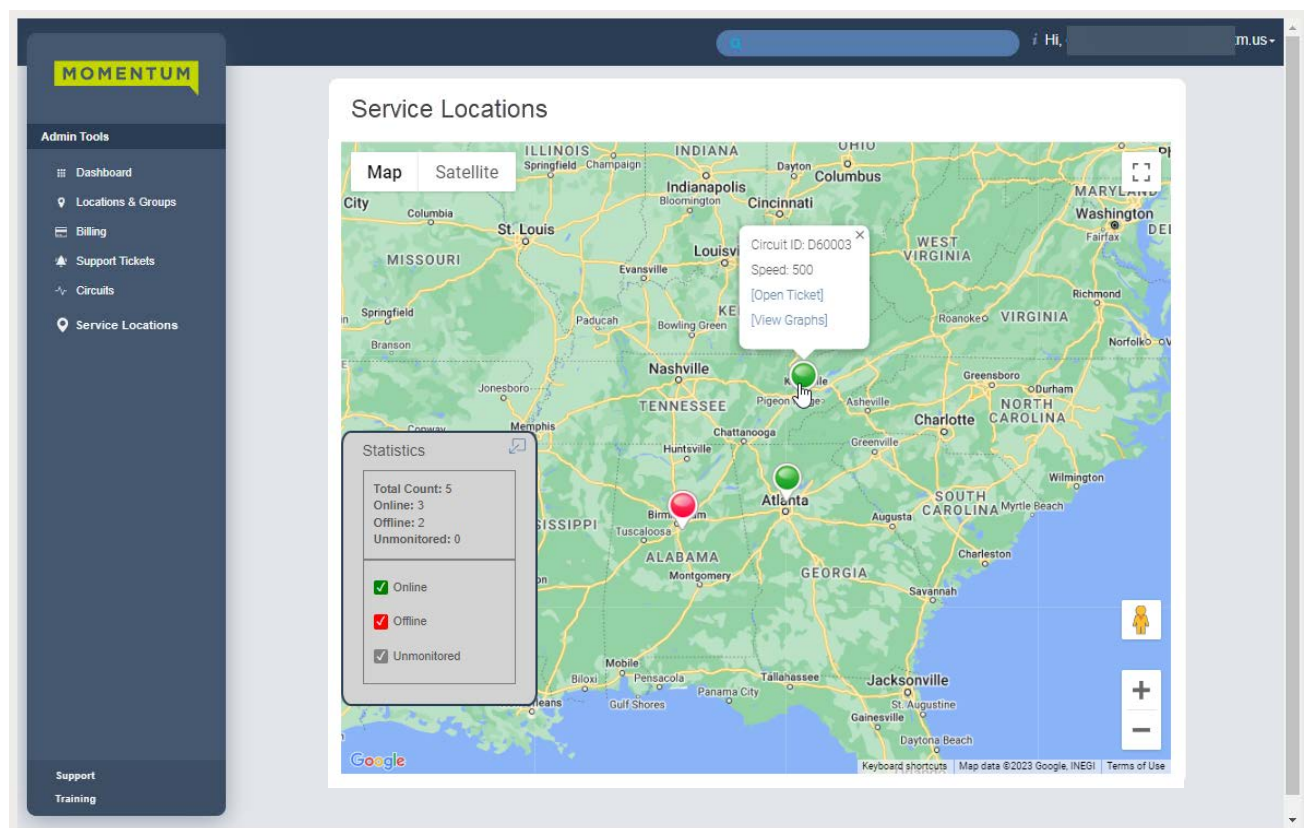

Graph data defaults to 'Today'. Use the Period drop-down selection tool to choose from Today, Yesterday or the Last 7, 30, or 365 days.

Hover the cursor over the graph to view more information about specific areas within the graphed data

Service Locations

[Beta] The [Service Locations](#) menu link opens a user-friendly map view of circuits currently being monitored.

- The map view can be expanded and moved around using the + | - tools (lower right) or the cursor.
- The map can be displayed in Map Terrain view or Satellite view.
- Basic Statistics display - select specific circuits to refine the data or minimize the statistics dialog view.
- Click on a pin in the map to view more information about a specific circuit noted in the map.

*Manage MFA

This area displays a list of the portal accounts the Admin has been granted permission to view.

Click on the **Manage MFA** option in the left navigation menu to open the **Manage MFA Users** section. This view displays a **↑** sortable **↓** and searchable list of the User and Admin portal access accounts that are currently set up on the organization's system. This area makes it very easy to view the MFA usage of the organization's portal users and quickly assist users who need help with MFA protocols to gain access to the portal. The SuperAdmin can see all portal access accounts for their organization's users and Admins. Group Level Admins can see the portal access accounts for the users in the groups/locations they are authorized to manage.

Manage MFA Users

User ID	Azure User Name	Email	Verification Method	Last Reset	Manage User
4638	prod...	st			
2637	2056...	ja	app	2023-11-09	Reset MFA
1640	4706...	de		2024-02-14	Reset MFA
1638	4703...	ve		2023-10-23	Reset MFA
1637	1657...	ja	sms	2023-10-23	Reset MFA
1622	4706...	st		2023-10-23	Reset MFA
1618	4706...	st	sms	2024-02-14	Reset MFA

This section also offers a simple section search tool at the top of the list. The information provided in this page for each listing includes:

- **User ID** - The Service Provider's user account identification number
- **User Name** - The login user name credential for Users ([TN]@mymtm.us) and admins (email)
- **Email** - The notification email address if defined for the user/admin account in Manage Users
- **Verification Method** - The users' currently activated MFA protocol type (SMS text or one of the apps)
- **Last Reset** - The date the last MFA Reset action was performed for the account

Reset MFA

This button provides Admins with information about the state of each user's MFA activation status and a simple way to immediately disable/disconnect the current setup and prompt the user to set up a new MFA protocol during the login process (if MFA use is Mandatory).

- Grayed button = MFA is inactive/not currently set up for the account - a reset cannot be performed.
- White button = MFA is active/in use for the account - a reset can be performed.

Simply click on the **Reset MFA** button adjacent to the desired account if it is active to immediately deactivate the user's current MFA method (SMS Text or App). Once clicked, the button will turn gray and will not become available to click again until the user has set up an active MFA protocol for portal access.

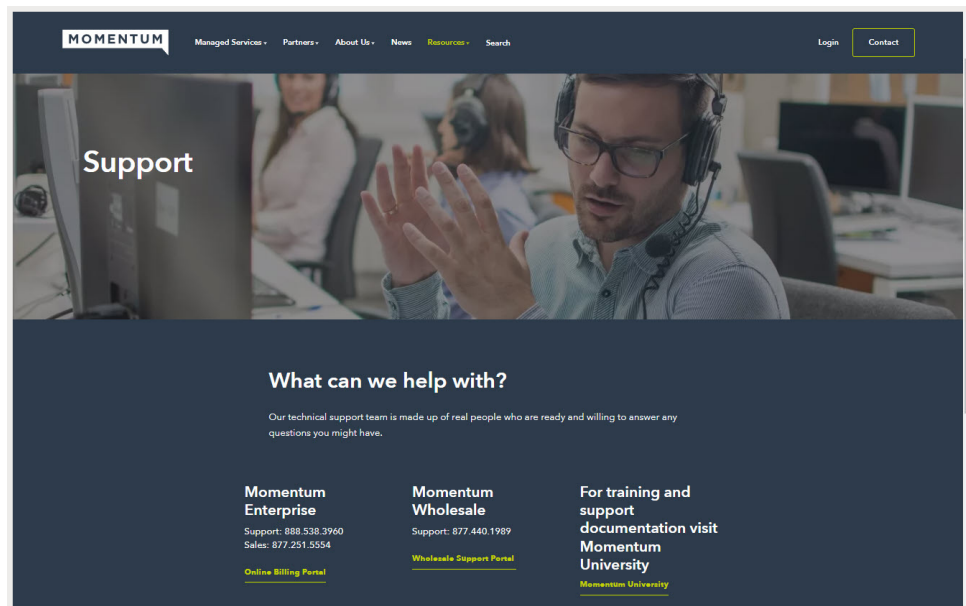

This action will allow the selected portal account holder to:

- Sign in and bypass MFA protocol usage during portal login if MFA use is set to Optional.
- Be prompted by the system to select and set up a new MFA verification code receipt method (SMS Text or authentication app) during login if MFA use is Mandatory.

Note: If the user/Admin is currently logged into the portal, an MFA Reset is not necessary. Users may modify their own MFA method selection/setup by going to **My Profile > View Profile > Manage MFA** and following the relevant setup/activation steps.

SUPPORT

The **Support** option in the left navigation *Menu* panel (and in the quick access drop-down menu at the top of the screen) is a quick link to the Support page on the GoMomentum.com website.

TRAINING

The **Training** option in the Menu panel (and in the quick access drop-down list at the top of the screen) opens the Momentum University library in a new browser page. This web page offers links to useful Momentum University documentation, information, and videos about Momentum products and services that are available to customers 24/7. The **My Cloud Services Portal** section offers comprehensive documentation to help you work in the portal, or to download copies of the documentation for future use. Please note, all documentation and resources provided in Momentum University are updated frequently to keep the information up to date - so check back often.

CONTACT US

A team of expert support professionals are here to assist with technical issues, questions related to billing, feature usage, service upgrades, and any other general inquiries you may have.

Simply contact us and a representative will help you with your request.

SUPPORT BY PHONE

A phone call to Customer Care is the fastest way to get help when you need it.

888.538.3960

Live phone support is available 24/7 for speedy assistance and issue resolution.

Have your Momentum Telecom account number handy to help us better assist you when you need us.

Important: In order to provide *optimal* support, we recommend that the Account Owner or an Authorized Contact contact us via our toll-free support number (above) regarding any critical issues that may require quick troubleshooting for resolution. Support Tickets submitted via the subscriber portal or email are considered minor issues or requests for information by default and will be worked as quickly as possible by the team in order of receipt. A call to customer care always ensures speedy assistance.

ONLINE SUPPORT INFORMATION

GoMomentum.com/support

Online options are provided to access Customer Support quickly and easily, including contact information and helpful tools to submit a support request ticket. For fast resolution, include the issue, details of your efforts to resolve (if any), methods to reproduce the issue, along with your account number and contact information.

USER RESOURCES

GoMomentum.com/MU

Momentum University is an online library of routinely updated training and support resources that will equip you with information about Momentum's best-in-class cloud services and their features. This library includes product user guides, FAQs, quick reference tools, tips, videos, and more - and it is always available for you to reference on the Momentum Telecom website - 24/7/365.

Check Momentum University often for the latest product information and helpful resources.
