

SPEED DIAL

This feature allows users to define multiple Speed Dial options for specified numbers using short two (2) digit codes (00-99) prefixed by the # sign. Certain Speed Dial 2-digit code combinations will conflict with some Feature Access (Star) Codes. All of the Star Codes are listed within the setting dialogs to assist the user during setup.

Please note: Phones often offer a quick way for users to set up Speed Dials via the phone's Line Keys and Settings.

Feature Settings

1. Sign into the **Voice Services Portal** website.
2. Go to User Settings or click on the [View All Features](#) link in the Basic Features card on the Dashboard.
