

GLOBAL INTERNET CONNECTIVITY

Customized connectivity wherever and whenever you need it

Stay connected in any environment

Get business-grade connectivity without the complexity with Momentum.

With over 20 years of experience delivering global enterprise connectivity, Momentum is trusted by more than 30,000 locations worldwide. Our global network has points of presence in more than 200 countries, and we maintain partnerships with over 750 carriers. And if you need connectivity somewhere we haven't been yet, we'll deploy our own circuits to extend your connection to wherever it needs to be.

Choosing Momentum means working with a single-source provider, so you only need to worry about one bill, one vendor, and one dashboard for all your Internet needs.

”

Our experience with momentum has been wonderful and we are very happy with the service and seamless communication through out the entire process. We were guided every step of the way. Top notch customer service and speedy installation!

Grand Bear Golf Course

HIGHLIGHTS

A resilient and redundant global network with POPs in **200+ countries**

One bill, one vendor, and **one dashboard** for all your Internet needs

Access **750+** carriers **without vendor lock-in**

Flexible, tailored services at the **best prices possible**

24x7 high-touch support from global networking experts

Maintain your momentum with high-speed global Internet

Momentum is your single-source provider for enterprise-level, scalable fiber-based Internet solutions. Whether through our own offerings or our carrier partners, we'll deliver connectivity that fits both your business and your budget like a glove.

Enable full-stack connectivity through a broad portfolio

Access a broad range of curated services, including SD-WAN, 5G, and managed networking — all delivered at the best price possible. Manage your connections and scale your services through a single intuitive dashboard for a seamless experience and full visibility.

Work with a diverse fiber and upstream backbone Internet provider

Momentum offers a range of connectivity options for business of all sizes, including DIA, business broadband, and high-capacity IP transit. Our connectivity options all support both IPv4 and IPv6, with speeds from 1.5mb-400gb.

Find the best bandwidth for your business needs

Select from multiple network access options, including point-to-point, VPLS, EVPN, VXLAN, Dark Fiber, customized low latency paths, Starlink, wireless, and undersea fiber. Choose from 10mb of bandwidth up to 800gb with the option to deploy additional lines for redundancy or failover.

Secure the best connectivity option at the best price

As a network aggregator that works with over 750 partners and carriers, we'll make sure your business gets the best prices possible. Our ability to connect circuits from different providers also allows us to stay fully network-agnostic, so there's no risk of vendor lock-in.
