

## MANAGED NETWORK

# Enjoy all the benefits of an enterprise network with none of the hassle

## Worry-free advanced connectivity

Whatever your networking needs, Momentum has you covered.

Trusted by over 30,000 locations worldwide, Momentum has been delivering diverse connectivity solutions to enterprise clients for over twenty years. Our carrier-neutral cloud is interconnected with over 750 carriers and service providers worldwide and includes both undersea fiber and customized low-latency paths. Most importantly, we'll customize our solutions to fit your needs, environment, and budget — offering you unmatched reliability, scalability, and security.

Get set up on a best-in-class network that's perfectly suited for your business — all you'll have to do is connect.

”

Our experience with momentum has been wonderful and we are very happy with the service and seamless communication through out the entire process. We were guided every step of the way. Top notch customer service and speedy installation!

**Grand Bear Golf Course**

## HIGHLIGHTS

High-touch 24/7 support

Diverse, custom-tailored connectivity options

Over 200 global points of presence on a geo-redundant carrier network

Consolidate multiple solutions, locations, and vendors into one invoice and dashboard

Deploy wavelengths for added resiliency, capacity, and versatility

# Dynamic, flexible, purpose-built managed networks

Whatever your networking needs, we'll design a solution to fulfill them. Every implementation is completed by a team of highly-trained engineers and maintained with high-touch support and hands-on management. And don't worry if we don't already have a presence in your region — we can deploy our own circuits and make our services available to you.

## Why Momentum?

**750+**

CARRIERS AND  
SERVICE PROVIDERS

**8,000+**

LOCATIONS SERVED

### Futureproof your network with wavelengths

Support diverse, bandwidth-intensive network applications with wavelengths. Futureproof your network with connections up to 400GE, diverse fiber routes, diverse end locations, and on-demand scaling to meet your evolving needs.

### Deploy diverse connectivity options

Choose between dark fiber, P2P, VPLS, EVPN-VXLAN, dedicated ethernet, metro ethernet, high-capacity broadband, wave, and more, all backed by an advanced, cutting-edge and carrier-neutral network built for performance and reliability.

## Simplify managing your networks. Partner with Momentum today
