

TEAMS OPERATOR CONNECT

Enable fast, convenient business calling within Microsoft Teams

Add dial tone to Teams with ease

Enabling PSTN connectivity in Microsoft Teams doesn't need to be difficult.

With Momentum as your Operator Connect partner, it won't be. Once you've gone through an automated onboarding process, we'll manage all the technical complexities, including PSTN calling and SBCs. For businesses seeking to further improve their phone system, we also offer a full suite of services and solutions covering everything from connectivity to reporting.

Work with Momentum, and we'll help you unlock the true potential of your Microsoft Teams deployment — starting with business calling.

How to start your free 14-day Operator Connect trial

- 1 Fill out the form here to get in touch with our Operator Connect team.
- 2 Join a quick onboarding call to get your Operator Connect activated.
- 3 Start making phone calls in Microsoft Teams

HIGHLIGHTS

One-click on-demand scaling via the Operator Connect dashboard

Ensure compliance with dynamic e911 functionality

Over 200 global points of presence on a geo-redundant carrier network

Get dedicated help with 24/7 high-touch support

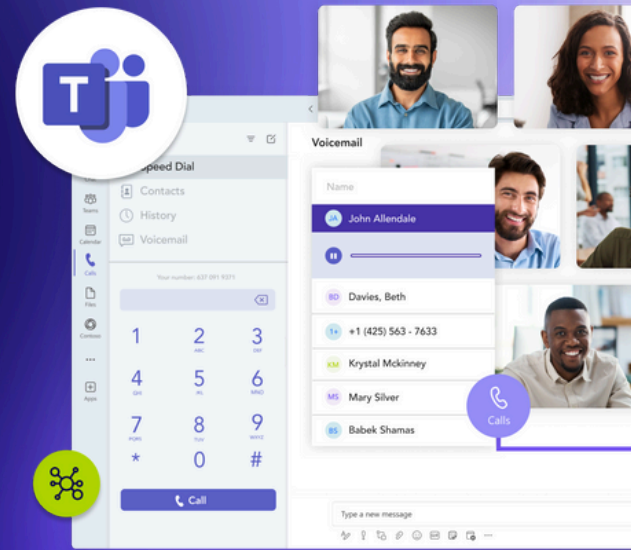

Advanced PBX functionality through an intuitive interface

All the benefits of a business phone, none of the complexity

As a trusted Operator Connect provider with over a decade of experience, Momentum will get your Teams deployment connected to the PSTN in just minutes.

With access to over 750 carriers, we offer both Momentum managed and self-service options, both supported by predictable monthly pricing and flexible plans for all your business calling needs.

Automated setup and deployment

Start making calls quickly with Momentum's seamless automated onboarding process. Register, provision, and assign phone numbers and migrate users in just minutes. Operator Connect through Momentum is the quickest, easiest way to add dialtone to Teams.

One platform for user and call flow management

Whether self-managed or fully managed by Momentum, Operator Connect streamlines administration with an intuitive and unified dashboard that empowers you to manage your entire deployment with just a few clicks, including users, numbers, devices, and more.

Simplified calling on any device

Use any Microsoft-Teams-enabled device, including desktop PCs, to both make and receive PSTN calls. Leverage existing carrier contracts or find a new operator to enable voice calls and access advanced features such as call recording, call analytics, and more.
