MOMENTUM

Bring cloud optimized SD-WAN to every branch

Keep branches online and apps fast with Meraki SD-WAN, managed end-to-end by Momentum.

Cloud-managed SD-WAN that works for your business

Keeping every branch connected and secure shouldn't require endless complexity or costly MPLS contracts. Cisco Meraki SD-WAN delivers a modern, cloud-managed approach that replaces rigid circuits and hardware sprawl with intelligent, resilient connectivity optimized for the applications your business relies on.

Achieve faster performance, built-in security, and a simpler IT experience across every location with a partner that can help you fully unlock Cisco Meraki.

Let Momentum design, deploy, and manage Meraki SD-WAN end-to-end, bringing sites online fast, enforcing security policies, and monitoring performance 24/7. With Momentum, you get the full value of Meraki from day one without overwhelming your IT team.

CISCO Meraki

HIGHLIGHTS

Simpler IT management: One cloud dashboard and zero-touch MX appliances.

Secure, resilient connectivity: Built-in security with dual uplinks and LTE failover.

Optimized app performance: App-aware routing and traffic shaping for SaaS and cloud.

Faster time-to-value: Expert design, preconfigured templates, and quick rollout.

24/7 monitoring and support: Momentum's NOC ensures uptime and rapid response.

The smarter way to connect and protect every branch

Cisco Meraki SD-WAN is built for distributed businesses that need secure, reliable connectivity without the complexity of traditional WANs. With Momentum managing the solution, you get faster time-to-value and peace of mind from day one.

CORE FEATURES AND CAPABILITIES

Meraki Dashboard
Manage networking and security in one place with full visibility across branches, apps, and users.

Integrated Security Stack
NGFW, IDS/IPS, AMP, and content filtering built directly into every MX appliance you use.

SD-WAN Intelligence
Application-aware routing and traffic shaping keep SaaS and cloud apps performing at their best.

Resilient Connectivity
Dual uplinks and LTE backup deliver always-on connectivity across every branch in your network.

Zero-Touch Deployment
Preconfigured MX appliances and cloud templates bring new locations online in minutes.

Analytics & Insights
Real-time monitoring of app usage, performance, and security events for smarter decisions.

Why Momentum?

Faster time-to-value with zero-touch appliances and templates

End-to-end deployment, from site provisioning to security policies

Fully managed or co-managed options for the level of control you prefer

Proactive 24/7 monitoring and escalation by our NOC

One partner, one bill means no vendor sprawl

Add secure, resilient SD-WAN with Momentum

Unlock the full potential of Cisco Meraki. With Momentum managing the platform, you get performance, security, and peace of mind from day one.
