

**STARLINK INTERNET**

# Add high-performance connectivity to remote and hard-to-reach locations

## Deliver reliable internet anywhere your business operates

Remote, temporary, and underserved locations often struggle with slow, unreliable, or unavailable connectivity because traditional carriers take too long to deploy or cannot reach these sites at all.

Starlink solves these challenges by delivering fast, low-latency satellite internet where fiber and fixed wireless are not available, giving businesses a reliable way to keep sites online, whether they are permanent, mobile, or off-grid.

Momentum makes Starlink work as part of your network, handling installation, configuring it for primary or failover use, and integrating it into your existing network and SD-WAN. You get reliable connectivity, managed end-to-end, through one provider, bill, and support team.

### HIGHLIGHTS

**High-performance satellite connectivity:** Fast, low-latency internet designed for business use in remote and hard-to-reach locations.

**Coverage where other carriers can't reach:** Available across Canada and the USA with no dependency on local fiber or fixed wireless.

**Flexible bandwidth plans:** Choose priority data tiers with clear usage caps and optional top-ups, starting at \$139.95 per month.

**Primary or failover connectivity:** Use Starlink as a main connection for remote sites or as a reliable backup for added resilience.

**Seamless network integration:** Configured in pass-through mode and integrated directly into your core network or SD-WAN.

**Fully managed by Momentum:** Installation, configuration, monitoring, and support is handled by one provider.

# STARLINK

# What's included with Momentum's Starlink solution

Momentum delivers Starlink as a fully managed service, from installation through ongoing support.

		
<b>High-performance satellite connectivity</b>  Fast, low-latency internet designed for business use, delivering consistent performance to remote and hard-to-reach locations.	<b>Get coverage where other carriers can't reach</b>  Works across Canada and the USA without relying on local fiber or fixed wireless infrastructure, making it ideal for remote sites.	<b>Choose from flexible bandwidth plans</b>  Select the ideal data tier with clear usage caps and optional top-ups, starting at \$139.95 per month to support your sites..
		
<b>Professional installation and mounting</b>  Momentum installs and mounts your Starlink kit using a single cord for power and connectivity, enabling faster, cleaner, and more reliable deployments.	<b>Seamless network and SD-WAN integration</b>  Configured in pass-through mode and integrated directly into your core network or SD-WAN for consistent primary or failover connectivity.	<b>Fully managed service and support</b>  Momentum manages provisioning, monitoring, bandwidth alerts, troubleshooting, and ongoing support as your single connectivity partner.

## Why Momentum?

Deep expertise in business internet and connectivity solutions

One vendor for connectivity, deployment, and management

White-glove support from installation to ongoing support

## Extend your network beyond traditional coverage

Momentum makes Starlink work inside your network. Book a meeting to see how we can deploy reliable connectivity to every site.
