

**RETAIL**

# Run every store on one managed network, voice, and security platform

## Every new store makes your network harder to manage

More locations mean more endpoints, POS systems, channels, and security exposure. The infrastructure that worked for ten stores starts to break as you scale. Most retailers are spread across legacy POS systems, fragmented networks, and too many vendors. Expansion slows down, troubleshooting gets harder, and customer data sits in environments no single team controls.

Momentum brings network, voice, security, and customer engagement together into a single managed service for distributed retail. Whether you run ten stores or a thousand, the model stays the same.

## Why Momentum?

**Retail expertise**

Designed around PCI requirements, distributed store operations, and seasonal demand with named resources on every engagement.

**One end-to-end partner**

Network, voice, security, and engagement managed by one team so IT and operations can focus on customers instead of coordinating vendors.

**Proven at multi-site retail scale**

Momentum connects and manages 36,000+ global enterprise locations, ranging from specialty retailers to large national and global chains.

## HIGHLIGHTS

**Keep transactions flowing:** Resilient networks with failover and wireless backup ensure POS, kiosks, and digital signage stay online.

**Secure by design:** Managed SD-WAN isolates payment systems, guest Wi-Fi, and back-office traffic automatically.

**Faster store rollouts:** 5G fixed wireless and pre-configured voice get locations running without waiting for fiber or long provisioning cycles.

**Unify communications with Teams:** Teams-based SMS, RCS, contact center, and call routing enable collaboration across every location.

**One managed partner:** Network, voice, security, and engagement all managed by a single partner.

# One partner for connectivity, communication, engagement, and security

Built for seasonal spikes, fast store rollouts, and the networks behind every transaction.

**Networks that keep every store running**

**Communication that scales with every store**

**CONNECT**

- Keep transactions online**  
Intelligent routing and 5G failover keep POS, kiosks, and digital signage live during outages and traffic spikes.
- Get new locations live in days**  
5G fixed wireless deploys fast, so seasonal pop-ups and new stores launch without waiting for fiber.
- Optimize critical apps by store**  
Application-aware traffic routing keeps POS, inventory, and back-office systems responsive.

**SECURE**

- PCI-aligned segmentation at every location**  
Managed SD-WAN from Cisco Meraki, Juniper, or Arista keeps POS, guest Wi-Fi, and back-office systems isolated.
- Deploy Zero Trust for distributed teams**  
Cato SASE replaces legacy VPN with identity-based access for HQ, field, and remote workers.
- Threat protection at the edge**  
Add built-in firewall, content filtering, and continuous monitoring to secure every store.

**COLLABORATE**

- Connect stores, teams, and HQ**  
Teams Phone and voice integrations create instant access between locations and headquarters.
- Stay online during outages**  
Built-in failover and redundancy keeps voice systems live, even when local networks fail.
- Scale new sites fast**  
Operator Connect, Direct Routing make scaling voice to new sites simple and repeatable.

**ENGAGE**

- Reach customers wherever they are**  
SMS, MMS, and RCS messaging handle service inquiries and promotions directly from Microsoft Teams.
- Unify contact and service channels**  
A unified Teams-based contact center brings phone, chat, and messaging together.
- Improve sales team visibility**  
Call analytics and transcripts surface what top sellers do differently and where deals stall.

**Protect transactions, customer data, and stores**

**Turn every customer interaction into loyalty**

## One partner to connect, secure, and manage every store

Tell us how many stores you manage, and we'll show you how to simplify. Talk to an expert today.
